

Manage

Measure

Analyse

MONITOR YOUR ENERGY SAVINGS IN REAL TIME !

COMPATIBLE WITH SYSTOVI SOLUTIONS

SMART SYSTEM TO CONTROL AND MONITOR THE ENERGY

SMART-R

Managing Systovi Solar Solutions, and much more.

BENEFITS FOR YOU

CONTROL

Manage your energy remotely, in connection with our intelligent weather service

HISTORY

Learn to optimize your energy autonomy while viewing your earnings

PROGRAMMING

Pre-set parameters for an economic and efficient heating in your home

REFERENCE HOMES

See and compare your energy performance with other SMART-R ambassadors

NOTIFICATIONS

Accurately manage interventions and information related to your system

Download the app now and check the performances of the SMART-R ambassadors homes!

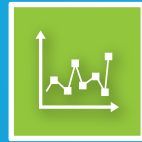

Available on web, tablet and smartphone.

In real time, visualise your energy production and consumption

Control your home energy performance

A detailed history for optimal analysis

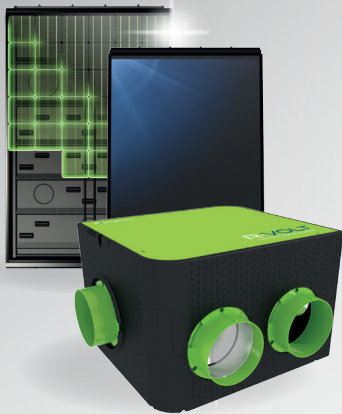

Check the weather

MAKE EVEN MORE SAVINGS!
TAKE CONTROL OF YOUR ENERGY GENERATION EQUIPMENT

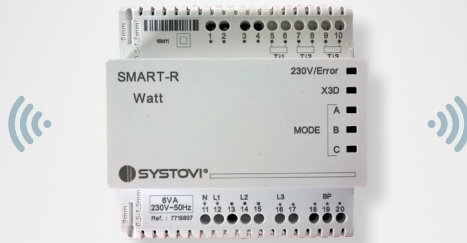

ALL ENERGIE OF THE HOUSE IN THE PALM OF YOUR HAND !

MODUL-R
Management of solar heat

Distributes and manages the heat recovered under the R-VOLT panels. Modul-R communicates with the app and the SMART-R Watt meter.

SMART-R Watt
Regulation & energy metering

This smart meter is connected to the home's energy infrastructure (electricity, heating, solar panels...) and sends data back to the SMART-R central management hub.

SMART-R
Management & monitoring

The SMART-R app provides remote controls for various devices, complete energy management and real time monitoring.

SMART-R solution is able to control, measure and analyse the performance of all heating and / or hot water systems in the house.
